

MVN Control Valve Actuator

MVN Control Valve Actuators are used with VBN2 2-way and VBN3 3-way Control Ball Valves and VRN Pressure Independent Control Valves to control hot and chilled water with glycol solutions up to 50% in heating, ventilating, air conditioning systems.

Overview

MVN Control Valve Actuators are used with VBN2 2-way and VBN3 3-way Control Ball Valves and VRN Pressure Independent Control Valves to control hot and chilled water with glycol solutions up to 50% in heating, ventilating, air conditioning (HVAC) systems.

Features & Benefits:

- Non-spring Return
- Floating and modulating
- Space saving, click-on installation – no tool required
- Extendable position indicator for easy commissioning
- Available with or without cable
- Compatible with control ball valves from 1/2 to 1-1/4 inches
- Compatible with pressure independent control valves from 1/2 to 1-1/4 inches
- Actuator can be mounted on the valve in any of four positions

Certifications:

- UL/cUL
- UL60730
